

Construction Update Routes 7/2, 2A & 127 Intersection Project – week of September 25, 2017

Hello,

Next week, the contractor, G.W. Tatro, expects to wrap up the installation of drainage at the junction of Bay Road, Route 127, and Route 7. The team's goal is to be ready to lay down a base layer of pavement at this intersection at the end of next week – a welcome development for motorists who have been driving on unpaved, rough roadway for the last few weeks. The paving will take two days and requires favorable (no heavy rain!) weather conditions.

In the meantime, please drive slowly through the construction zone. The contractor is trying to keep the unpaved road surface as smooth as possible until it is paved. G.W. Tatro has been re-grading the gravel road surface daily, even on weekends.

In addition to the work at the Bay Road intersection, the contractor will begin installing drainage pipe along Route 7/2 at the northern end of the project area, north Creek Farm Road.

There will be daily single-lane closures and alternating one-way travel. Please plan your travel to anticipate delays, especially during the peak AM and PM hours.

Access to businesses will remain OPEN at all times.

PLEASE DRIVE WITH CAUTION THROUGH THE WORK ZONE AND "HANDS FREE" IF USING A CELL PHONE.

Best regards,

Jill Barrett
